

2099 STATE GUIDELINES

One State • One Goal • One Victory

State 2099 is built on teamwork, preparation, fairness, and mutual respect. Every player has value—whether you lead rallies, join them, support your alliance, or play independently. Our success comes from working together toward a common goal.

1. Support the State

Every decision is made with one priority: what benefits the state as a whole.

2. Respect Each Other

Avoid attacking fellow state members in Arena or similar activities. Internal cooperation is always more valuable than internal conflict.

3. Prepare for SVS

Save resources, speedups, gems, gear materials, and development items whenever possible for SVS. Preparation is one of the biggest reasons behind successful results.

4. Equal Opportunities

Whenever possible, opportunities are rotated fairly so active members have the chance to participate and grow.

5. Event Rewards & Permanent Statistics

Permanent-stat rewards such as Name Cards and Permanent Skins are generally prioritized for Rally Leaders because these bonuses permanently strengthen rallies and benefit everyone who joins them.

For this reason, approximately 10–15 Rally Leaders are usually given priority for the highest permanent rewards, depending on the available slots and the needs of the state.

The remaining positions are awarded based on contribution, especially:

- SVS preparation
- SVS development efforts
- Organizational support

- Consistent contributions to state activities

This approach strengthens the state's long-term power while recognizing players whose dedication helped achieve success.

6. Every Contribution Matters

Leadership, rally participation, organization, resource management, and consistent activity all contribute to a stronger state.

"We don't build strong players. We build a strong state."

One State • One Goal • One Victory
